

Business Integration Solutions

Today, information technology excellence is not achieved simply by web-enabling your business functions. Forward-thinking firms are working to integrate all of their business processes end-to-end and across the enterprise. Truly innovative companies are extending those processes, and eliminating functional friction, between the enterprise and core customers and partners.

Business integration helps enterprises adapt. Experts from Proactive Global business integration practice can help your firm leverage legacy data in new and meaningful ways. When old-world obstacles are removed and previously siloed data is freed - applications can talk to one another and information can be exchanged.

When your business is truly integrated, value is created.

Proactive Global can help you create a 'real-time' enterprise by designing, developing, implementing and integrating a secure and scalable business integration solution that can:

- Extend and extract 'Green-Screen' applications
- Reduce infrastructure strains and cost
- Web-enable legacy applications
- Provide real-time insight into business metrics
- Introduce efficiencies for customers, suppliers and partners

Additionally, our experts can customize and deliver business integration analysis tools including strategy roadmaps, ROI assessments, business integration operational hub jumpstarts, education mentoring and much more.
