

Business Intelligence Solutions

In today's competitive landscape, successful companies rely on accurate, timely and integrated information. Forward-thinking companies classify, aggregate, and correlate data into meaningful business information to stay ahead of competition. By delivering relevant, focused and timely information, business intelligence helps companies make more informed business decisions. Proactive Global builds business intelligence solutions that allow our clients to transform data into knowledge for quick and effective decision making.

Proactive Global can help you create a 'real-time' enterprise by designing, developing, implementing and integrating a secure and scalable business intelligence solution that includes:

- Information Strategy
- Data Warehousing
- Business Analytics and Reporting

Additionally, our experts can customize and deliver business intelligence solutions and tools including strategy roadmaps, ROI assessments, business intelligence jumpstarts, education mentoring and much more.
