

## Infrastructure

Our development center is fully equipped to handle various software development projects. The facility is equipped to house more than **150 people** with an additional capacity to add another 200. There are **recreational activities** and **training centers** for use by our staff. The center is equipped with leading edge hardware, software and network facilities and provides infrastructure for:

- Completely networked work environment
- High speed data communication links
- Round-the-clock physical security
- Network security and Disaster Management
- Preventive Maintenance of Software
