

Portal Solutions

An enterprise portal acts as the gateway to information and applications throughout the enterprise. It simplifies and facilitates the processes of integrating underlying business infrastructure and transforming how customers, partners and employees manage and share mission-critical data, services and applications.

Proactive Global consultants have implemented and customized hundreds of portals. We can help you create a 'real-time' enterprise by designing, developing, implementing and integrating a secure and scalable portal that includes:

- Searchable data systems
- Collaboration for process improvement
- Integrated/ Web- enabled enterprise systems and apps
- Unified, extended reporting
- Content management and personalization

Additionally, our experts can customize and deliver portal business analysis tools including strategy roadmaps, portal value assessments, portal jumpstarts, education mentoring and much more.
