

Wireless/ Mobility Solutions

Gone are the days when mobile phones simply allowed you to talk to another person. As phones morph into hand-held televisions, computers, and MP3 players, so too does the public's need for up-to-the-minute information, sophisticated applications, and Multimedia content. Proactive Global Wireless/Mobility Technology Solutions deliver Wireless capabilities to carriers, Mobile Virtual Network Operators (MVNO), Mobile Virtual Network Enabler (MVNE), and the enterprise. Proactive Global expertise with Wireless technologies such as SIP, MMS, WAP, and GPRS are coupled with our deep expertise in Mobile Content Delivery.

Proactive Global consultants have implemented hundreds of wireless solutions for Carriers, Handset Manufacturers, and the Enterprise. We can help you create sophisticated Mobile solutions by designing, developing, implementing and integrating a secure and scalable solution which includes:

- Mobile Content Delivery Systems
- Web Content Management
- Wireless Value-Added Services (SIP, IMS, SMS, MMS, Push-to-Talk)
- Custom developed applications to Pervasive devices (Symbian, WML, J2ME, MIDP, Linux)
- Customer Care Solutions (Provisioning, Mediation, Rating and Billing)
